If you would know the Interest of One Hundred Pounds for one Month, two Months, three Months, six Months, nine Months, or one Year, look for 100l. in the Side, and in the next Column, under 1 Month is 8s. 4d.; for 2 Months 16s. 8d.; for 3 Months 21. 5s.; for 6 Months 42. 10s.; for 9 Months 61. 15s.; and for a Year 5l.; and so of the rest.

This is the honest Way by which Men should  
To Interest let their Silver and their Gold;  
Yet worldly Wisers, when to Raking fall,  
They with their Interest get the Devil and all.

# LAW TERMS, &c.

5

## A TABLE of Terms and Returns for the Year 1786.

Hilary Term begins Jan. 23, ends Feb. 13.

Returns or Effoign Days.		Exc.	Ret.	Ap	W. D.
Eight Days of St. Hilary	Jan. 20	21	22	23	Monday
From the Day of St. Hilary in 15 Days	27	28	29	30	Monday
On the Morrow of the Purif. of Bl. V.M. Feb.	3	4	5	6	Monday
Eight Days of the Purif. of the Bl. V.M.	9	10	11	13	Monday

Easter Term begins May 3, ends May 29.

From the Day of Easter in 15 Days	May 1	1	2	3	Wednesd.
From the Day of Easter in 3 Weeks	8	8	9	10	Wednesd.
From the Day of Easter in 1 Month	15	15	16	17	Wednesd.
From the Day of Easter in 5 Weeks	22	22	23	24	Wednesd.
On the Morrow of the Ascension	26	27	28	29	Monday

Trinity Term begins June 16, ends July 5.

On the Morrow of the Holy Trinity	June 12	13	14	16	Friday
Eight Days of the Holy Trinity	19	19	20	21	Wednesd.
From the Day of the H. Tr. in 15 D.	26	26	27	28	Wednesd.
From the Day of the H. Tr. in 3 Weeks	July 3	3	4	5	Wednesd.

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the Morrow of All Souls	Nov. 3	4	5	6	Monday
On the Morrow of St. Martin	13	13	14	15	Wednesd.
Eight Days of St. Martin	18	19	20	21	Tuesday
From the Day of St. Martin in 15 Days	25	26	27	28	Tuesday

N. B. No Sittings in Westminster-Hall on Ascension-day, Midsummer-day, and the Second of February.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, The first and last Days of every Term are the first and last Days of Appearance.

## Common Notes for the Year 1786.

Golden Number	1	Quinquagesima Sunday	Feb. 26
Cycle of the Sun	3	Easter-Day	Apr. 16
Dominical Letter	A	Rogation Sunday	May 2
Epact	0	Ascension-Day	25
Sundays after Epiphany	5	Whit-Sunday	June 4
Number of Direction	26	Sundays after Trinity	24
Quinquagesima Sunday	Feb. 12	Advent Sunday	Dec. 3

## P R E F A C E.

*SECUM habitant Sapientes; Musis inimica turba  
Carpe diem, post est Occasio calva.*

Sweet Solitude! she humbly dwells  
In rural Haunts, or arched Cells;  
And, ever shy of wild Resort,  
Flies from the Circle of a Court.

While the giddy Multitude are captivated only by the grossest Objects of Sense; no wonder that the studious Votaries of those more divine ones, which engage, and I may say absorb, the mental Faculties, flee the busy Haunts of Men, and seek the secret Shades of Retirement, and the cool Grotto where peaceful Contemplation sits silently musing, lulled by the Murmurs of the babbling Brook, or the Music of the warbling Choir of feathered Songsters, while the Heavens declare the Glory of God, the Firmament shews his handy Works, and Nature in ten thousand wonderful Varieties displays all around the amazing Wisdom of the Adorable Being who is, and was, and is to come.

This is the Man with Treasures of his own,  
To fordid Souls of baser Mould unknown,  
Can quit the busy Crowd, and dwell alone  
Within his spacious Mind :

To Worlds unknown through boundless Tracks can stray  
On Contemplation's Wings can soar away  
To Realms of Bliss supreme and endless Day,  
Nor leave a Thought confin'd.

It has often given me great Pleasure when I have read in the precious Reliques of those Sons of Genius who, having left the cumbrous Part of their Existence to the Worms, are now soaring at large in the Mansions of delight, to find that they have ever and anon fallen into a belief, that not only the Knowledge of the

past and the present, but even of future Contingencies also, is attainable, at least in some degree, by the frail Sons of Mortality. And here, I think, to the pensive Reader, a few Quotations from Poets of an established Reputation will not be disagreeable. And, first let us hear the Opinion of the much admired Mr. Pope.

All Nature is but Art, unknown to thee;  
All Chance, Direction, which thou canst not see.  
All are but Parts of one stupendous Whole,  
Whose Body Nature is, and God the Soul.

If our Enemies assert that the Planets were formed for nobler Purposes than to give idle Intelligences to dreaming Astrologers; these he informs that

In human Works, though labour'd on with Pain,  
A Thousand Movements scarce one Purpose gain:  
In God's one single can its End produce;  
Yet serves as second to some other Use.

Nor could the witty Author of Hudibras help acknowledging the Influence of

The Silver Moon, whose vast Command  
Rules all the Sea and half the Land;  
And over moist and crazy Brains,  
In high Spring Tides at Midnight reigns.

Many more Proofs of the same kind might be produced if my scanty limits would admit; I cannot, however, omit the following:

To rise in Science as in Bliss,  
Initiate in the Secrets of the Skies,  
To read Creation; read the mighty Plan,  
In the bare Bosom of the Deity.  
The Plan and Execution to collate,  
To see, 'before each Glance of piercing Thought,  
All Cloud, all Shadow blown remote, and leave  
No Mystery.

YOUNG.

And the ingenious Flatman, after having spoke in Contempt of our Art, immediately breaks out thus:

Yet pardon me, ye glorious Lamps of Light:  
'Twas one of you that led the way,  
Dispell'd the gloomy Night,

And shew'd the Magi where th' Almighty Infant lay.

Now Winter spreads his wide Domains,

And horrid Devastation reigns;

No Verdure decks the Ground:

Dead is the vegetable World,

Dumb is the tuneful; all is hurl'd

In sad Confusion round.

# 10 FEBRUARY XXVIII days.

Dim rises Morn, the lowring Sun  
Seems loth his destin'd Course to run,  
While Vapours round him croud:  
All dull and heavy wears the Day,  
Nor Sol emits one chearful Ray,  
Clad in a wintry Cloud.

M.	Sun rises	Sun sets	Moon's South	Monthly Observations
1	6 34	5 26	0 a 41	The quartile aspect of the Sun with Mars,
2	6 32	5 28	1 33	then again of Mars with Venus, and after-
3	6 30	5 30	2 27	wards with Mercury, ought to put us upon
4	6 28	5 32	3 23	our guard. Certainly, however we may be
5	6 26	5 34	4 21	covetous of prying into Nature's closet, or
6	6 24	5 36	5 21	looking into the womb of futurity, God has
7	6 22	5 38	6 21	made us to live in doubt, and subject to error,
8	6 20	5 40	7 18	First quarter 7 day at 5 morning
9	6 18	5 42	8 12	that we might be kept in awe by fear, and in
10	6 16	5 44	9 2	humility by disappointment. I will positively
11	6 14	5 46	9 49	say, There is a work in hand; but I will not
12	6 12	5 48	10 34	determine what. The lot is cast into the lap,
13	6 10	5 50	11 16	but the disposal thereof is from the Lord.
14	6 8	5 52	11 57	It was justly observed by an ancient writer
15	6 6	5 54	morn.	Full moon 11 day at 10 evening
16	6 4	5 56	0 38	upon this subject, that if the celestial wan-
17	6 2	5 58	1 19	derers emit their rays friendly and favourably,
18	6 0	6 0	2 2	as we behold them from the Earth, or in a
19	5 58	6 2	2 47	contrary direction, we may notice their effects
20	5 56	6 4	3 35	to be the same. If fate be certain, as some-
21	5 54	6 6	4 26	times better concealed: if not, as our opinion
22	5 52	6 8	5 18	has always been, that <i>astra cogunt non regunt</i> ,
23	5 50	6 10	6 11	let us in time look about us. To know but in
24	5 48	6 12	7 5	East quarter 23 day at 2 morning.
25	5 46	6 14	7 58	part, is the lot of humanity; but to know less
26	5 44	6 16	8 50	than we might by industry attain to, is a mark
27	5 42	6 18	9 41	of stupidity. And be assured, that He who
28	5 40	6 20	10 33	moves the Earth and its inhabitants as he
29	5 39	6 21	11 26	he pleases, moves the stars also.
30	5 37	6 23	0 a 20	New moon 29 day at midnight.
31	5 35	6 25	1 16	

But now behold bright Phœbus rides,  
To bleſs our Clime with haſty Strides,  
And ſpreads a genial Ray;  
And now a ſweet enamell'd Green  
Begins to beautify the Scene,  
Againſt approaching May.

M	Sun rises	Sun sets	Moon's South	Monthly Observations
1	5 33	6 27	2 a 15	Saturn limps about strangely this month,
A	5 31	6 29	3 15	and takes upon him methinks to be very active.
3	5 29	6 31	4 19	Out of ten aspects, he is employed in five.
4	5 27	6 33	5 19	Yet none of them seem to affect us, unless at
5	5 25	6 35	6 15	second hand.
6	5 23	6 37	7 7	<b>First quarter 5 day at 4 aftern.</b>
7	5 21	6 39	7 56	I know that many say they don't believe any
8	5 19	6 41	8 41	thing about the influence of the Planets. My
A	5 17	6 43	9 23	answer is, I do. And, to bring an instance
10	5 15	6 45	10 4	from one who knew propheticall matters much
11	5 13	6 47	10 45	better than any of us in this present age can pre-
12	5 11	6 49	11 26	tend to do, let such a one ponder these words:
13	5 9	6 51	morn.	The stars in their courses fought against Sisera.
14	5 7	6 53	0 8	If they interpret this as a poetical licence,
15	5 5	6 55	0 53	<b>Full moon 13 day at 3 aftern.</b>
A	5 4	6 56	1 40	they take greater liberties with the sacred writ-
17	5 2	6 58	2 29	tings than I dare do. If they deny its truth,
18	5 0	7 0	3 20	it is more than I, or I think any Christian Phi-
19	4 58	7 2	4 12	losopher dare say. But my kind and sensible
20	4 56	7 4	5 5	Christian readers, who have been long acquaint-
21	4 54	7 6	5 57	ed with my productions, will, I doubt not,
22	4 52	7 8	6 48	join me in the following quotation from the
A	4 50	7 10	7 38	pious and learned Dr. Watts:
24	4 47	7 11	8 27	<b>Last quarter 21 day at 4 aftern.</b>
25	4 49	7 12	9 17	Should all the baleful Planets shed
26	4 45	7 15	9 9	Their mingled curses on my head;
27	4 43	7 17	11 4	Creatures, with all their boasted sway,
28	4 41	7 19	0 a 3	Are but his slaves, and must obey;
29	4 40	7 20	1 5	They wait their orders from above,
A	4 38	7 22	2 8	And execute his vengeance, or his love.
				<b>New moon 28 day at 8 morning.</b>

Flora again her Pride resumes,  
 The Flowers spread their rich Perfumes,  
 And gaily paint the Ground;  
 The God of Day, with liv'ning Beams,  
 Dispels the Mists, unlocks the Streams,  
 And Beauty shines around.

## Monthly Observations

1	4	36	7	24	3	a	12	The benevolent Configurations of the celestial Bodies in this Month, I hope, predict some grand Endeavours to Pacification; and the only one I think of evil Import, seems not to
2	4	34	7	26	4		11	
3	4	33	7	27	5		6	
4	4	31	7	29	5		51	
5	4	29	7	31	6		44	
6	4	27	7	33	7		28	First quarter 5 day, at 4 morn.
A	4	26	7	34	8		9	affect us. We, however, seem to be generally
8	4	24	7	36	8		49	troubled, and labouring under Discontent, pre-
9	4	23	7	37	9		29	saging fatal Events; and while we exclaim,
10	4	21	7	39	10		11	<i>Felix qui potuit rerum cognoscere causas</i> , are apt
11	4	19	7	41	10		55	to dive into Difficulties beyond the Depth of
12	4	18	7	42	11		49	our Comprehension. News upon News of
13	4	16	7	44	morn			various Kinds. A confused Jumble of Truths
A	4	15	7	45	0		29	Full moon 13 day, at 7 morn.
15	4	13	7	47	1		20	and Falsities are intermixed so artfully, that
16	4	12	7	48	2		12	Time alone must unravel it. Death is the
17	4	10	7	50	3		4	common Lot of all; his Shafts fly hourly
18	4	9	7	51	3		56	around; and High and Low, Rich and Poor,
19	4	8	7	52	4		46	fall daily Victims to the grim Tyrant!
20	4	6	7	54	5		35	It may therefore be said, that an Astrologer
A	4	5	7	55	6		22	may safely predict it in any Month. Yet, if
22	4	4	7	56	7		9	Last quarter 21 day, at 1 morn.
23	4	2	7	58	7		59	a Man foretells a common Event, and points
24	4	1	7	59	8		51	the Time, and Facts prove the Verity of the
25	4	0	8	0	9		46	Prediction, I see not, as <i>Tempus Index Rerum</i>
26	3	59	8	1	10		45	
27	3	51	8	2	11		47	New moon 27 day, at 4 aftern.
A	3	57	8	3	0	a	51	est, how any one can gainsay it.
29	3	55	8	5	1		54	
30	3	54	8	6	2		53	
31	3	53	8	7	3		47	

The teeming Earth now garnish'd o'er,  
 Spreads all around her various Store,  
 Where'er we turn our Eyes:  
 The Swain, with Joy and sweet Delight,  
 Rejoices at the gladd'ning Sight,  
 With Wonder and Surprize.

## Monthly Observations

This is certainly a busy Month, and the  
 Three Quadrate Aspects, in Two of which

First quarter 3 day, 7 even.

England is concerned, as well as the hateful  
 Opposition of Saturn against Mars, darken the  
 Prospect. Great are the Expectations of the  
 People; and many Difficulties are apparent.  
 Matters of great Concern are under Consider-  
 ation, and Commotions in various Parts of the  
 Mundane System are too frequent. Treach-

Full moon 11 day, at 10 night.

eries and Mutinies, Troubles and Distractions,  
 will, I fear, too much abound. In all public  
 Calamities many private ones are unavoidably  
 involved; and some Losses by Sea and Land  
 may be expected. Fire and Water are both  
 avengeful Ministers in God's Hand, to execute  
 his divine Pleasure. However, I hope anon

Last quarter 19 day, at 8 morn.

the Storm will blow over, and the Prospect  
 brighten once more.

In the mean Time, let us look on what is  
 doing in the wide World, as a Memento to

New moon 25 day, at midnight.

us, that nothing of solid Good is permanent  
 here; that we are only Sojourners in this  
 earthly Tabernacle; and wait for a Taber-  
 nacle not made with Hands, eternal in the  
 Heavens.

On Cancer Sol now mounted high,  
His soaring Beams around the Sky  
Throws forth in flaming Rays:  
And well the parching Season suits,  
To ripen Grain and mellow Fruits,  
Against Autumnal Days.

## Monthly Observations

*Sceneco, cum venia datur, plura possum.*

First quarter 2 day, at 3 morn.

However some Parts may be affected in this terrestrial Orb, I see nothing here but the common inevitable Calamities, which must attend us frail Children of Mortality in this State of Probation, to affect our *British* Isle. May we always be truly thankful for Mercies received,

Full moon 9 day, at 10 night.

whether private or national; always remembering to shew forth our Praise, not only with our Lips, but in our Lives; at the same Time seriously reflecting, that, whether we consider the Matter in a religious or a political Light, in the Midst of Life we are in Death; and of

Last quarter 16 day, at 5 even.

whom may we seek but the great Arbiter of all Things, whose Ways are past finding out; in him be our Trust. We frail Sons of Dust see but in Part: and what appears to us all Gloom, may end in a Blaze of Glory, The

New moon 23 day, at 8 night.

more we reflect, the more we are lost in the stupendous Dealings of Providence. *Joseph* was advanced to the highest Dignity under *Pharaoh*; from a Jail to a Palace. Inscrutable are the Ways of Providence.

First quarter 31 day, at 9 night.

Now Swains prepare their Barns and Floors,  
To gather in Autumnal Stores,  
While Sol pursues his Way;  
And downward now, with full Career,  
To Libra's Beam he does repair,  
To balance Night with Day.

## Monthly Observations

It was in the Year 1784, in my Prognostications for this Month, I gave some Hints of Damages by Fire; which I have Informations by me, from several Quarters, happened exact to the Time; and in Places at no great Distance from me, I think five happened, some of which were under my own Inspection.

Full moon 7 day, at 5 aftern.

Now what may make this appear very odd, is, that just opposite to this Prognostication, you will find  $\square \frac{1}{2} \delta$ , with this Observation under it:

This last Aspect threatens severe Rain, which, in all Probability, with small Variation, will be so. Last quarter 14 day, at 8 morn.

ation, may continue during the whole Month. Now, how opposite were these two Predictions! Just as opposite as Fire and Water.— Did I do it by Chance? No: Chance itself I might have found a thousand other Places; but never a more improper one to have placed that

New moon 22 day, at 3 morn.

Piece of Intelligence in. Did I do it by Design? I did: but it was with a Design to forewarn the Public of what I sincerely believed would happen, and what I really found did happen. Life's a short Tragedy. This World's a Stage.

First quarter 30 day, at 7 morn.

Now Swains behold the naked Plain;  
 See hoary Winter comes again,  
 And Mortals bar the Door  
 'Gainst pelting Rain or fleecy Snow;  
 While in their Sheds the Oxen low,  
 And Autumn laughs no more.

## Monthly Observations

What I then foretold I wish I may never have Occasion to repeat; but the Things that have been will be; and there is no new Thing under the Sun.

Here are malicious Aspects sufficient to raise

Full Moon 6 day, at 2 morn.

Suspensions of ill Omen; but if the Lord be on our Side, who shall be against us. The great Cardan observes, that the Principles of Art are three, Reason, Sense, and Experience; but

Last quarter 12 day, at 8 night

then he observes, that Life is short, Art long, and Experience not easily obtained. On the other Hand, the Principles of Operation are four; the Planets, the *Loci Cæli*, the Fixed Stars, and the Position of all these in respect of one another. For Heaven, says he, is the Instrument of the most high God, whereby he

New moon 20 day, at 10 night

acts upon and governs inferior Things.

Mischiefs I apprehend, both by Sea and Land: and the Oppositions we find of ♃ to ♄, again to ☉, and after to ♀, will certainly be attended with undesirable Effects.

First quarter 28 day, at 9 night

# 30 DECEMBER XXXI Days.

Here see, fond Man, as in a Glas,  
 Life's various Seasons how they pass,  
 And this short Maxim glean:  
 Thus Life's short Spring shall soon decay,  
 Summer and Autumn fade away,  
 And Winter close the Scene.

♂ 6	1	1	Fomelhaut	11	14	19	11	10	37
♂ 56	2	1	Head of Andromeda	10	42	10	10	2	56

THE brightest of the seven stars is of the third magnitude, and hath 61 degrees of meridian altitude, and in colour participates of the D and G.

The fixed stars all rise, South, and set about four minutes sooner every night than they did the night before; is considered, the exact time of rising, Southing, and setting for any intermediate night, not herein noted, may be very easily deduced from these tables, by inspection only.

To know the time of rising, Southing, and setting of any star in this table, for any day required, it is but considering how many hours and minutes that star rises, Souths, or sets, either before or after the seven stars on that day, and you will have your desire; observing that in this table, a stands for after, and b for before.

A Table shewing the Bearing, Distance, Longest Day, and Difference of Meridians of most of the principal Cities in the World, from the famous City of LONDON.

## P R O E M.

To the MEMORY of the Immortal P T O L E M Y.

**R**EST learned Sage, whose sacred name  
Still Memory holds dear;  
Secure of an immortal fame,  
And freed from ev'ry care.

Prophet of fate, thy skill divine  
The rolling planets shew,  
And tell each mortal as they shine,  
How much to thee we owe.

Nor ever may unhallow'd feet  
On thee regardless tread;  
But pass with awe and rev'rence meet,  
The mansions of the dead.

No more dost thou thy Vigils keep,  
Thy watchings now are o'er;  
Oh peaceful may thy ashes sleep,  
Till stars shall shine no more.

E're long must we ourselves betake  
Each to his darksome bed;  
And lie till the last Trump shall wake  
The nations of the dead.

Oh then may I triumphant rise,  
And joyfully repair,  
To meet the Sage in cloudless skies,  
And scan his lectures there.

*Felices animæ, quibus hæc Cognoscere primum.* Ovid, lib. I.

*Faß.*

**H**E who has with industry travelled through the intricate paths of Geometry and Astronomy, has step'd far beyond the common track of mortals; and in so doing has performed a great and commendable task. He, and he alone, is happily arriv'd at the strait gate, which rightly leads to the inmost recesses of true and judicial astrology, which is the *sanctum sanctorum* of all human skill. But alas, by the time all this is acquired, the man is most commonly fatigued, and tired out.—Then—What then is to be done?—Must he lose the credit of all his former acquisitions, merely because he can reach no further? By no means.—Let him then magnify his present attainments, which indeed are truly valuable, and he shall villify the summum bonum which either through laziness or incapacity he could never arrive at. Thus having climb'd the Colossus of human learning, till he is mounted shoulder high, he very wisely concludes that it is only lopping off the head, and then he is already as high as he possibly can be.

And thus the wretch to wisdom makes pretension,  
By damning all beyond his comprehension.

I have however the satisfaction to find by the sale of my annual productions, that notwithstanding the scoffs of infidelity, and the spurious productions of deceivers, (both which I pass over with an equal eye of contempt) that my nocturnal labours meet with the approbation of multitudes of my British fellow subjects, and those not of the gay, vain, and unthinking, who love laughing better than logic, and would barter true judgement for a joke; but the solid, sober, and sensible part of mankind. And although this may seem a vain-glorious compliment upon my own performance; yet strict justice demands that I say it is no more than the naked truth, and therefore no compliment at all upon my worthy and loving readers.

I shall therefore according to my accustomed method proceed; and first

Of the ECLIPSES of the present YEAR, 1786.

Within the circuit of this year five times shall the two grand luminaries be eclipsed, but none of these will be visible to the inhabitants of Great Britain, the particulars of which are as follows:

The first is an invisible Eclipse of the moon, on Jan. 14.

Beginning about half past 11 in the morn.

Middle — at 44 min. past 12,

End — at 55 min. past 1 in the afternoon.

Digits eclipsed  $4^{\circ}$ ,  $47'$  on the moon's south limb.

The second will be an invisible eclipse of the sun on the 20th of Jan. at 2 hours 38 min. in the morning. He will at 3 o'clock be centrally eclipsed on the meridian in  $134^{\circ}$  deg. East longitude, and  $32^{\circ}$  deg. North latitude.

The third will be a total Eclipse of the moon on the 11th of July, but to us invisible, as follows:

	h	m	
Beginning of the Eclipse	-	-	8 56 Morn.
Beginning of total darkness	-	-	10 21
Middle of the Eclipse	-	-	10 40
End of total darkness	-	-	11 0
End of the Eclipse	-	-	12 24

The fourth will be an invisible Eclipse of the sun on July 25th, at 9 hours 11 min. mane. He will be centrally eclipsed in  $42^{\circ}$  deg. East long. and  $43^{\circ}$  deg. South lat.

The fifth and last will be an Eclipse of the sun on Wednesday the 20th of December at 49 min. past 4 in the afternoon, and consequently to us invisible.

I have before observed, that *Nil nocet Eclipsis illis regionibus in quibus non videtur*; and I think made it appear to every unbiassed and intelligent reader, that Eclipses have from time to time prefaced great changes in mundane affairs; to which indeed all history bears testimony. As to those who will gainsay all argument, I will only say, that these things not only require an ear to hear, but also a head to understand; which does not fall to every man's lot.

Before I proceed any further I will here give the curious calculation of a transit of Mercury over the sun as follows:

May 3d,  $\gamma$ 's Tranfit over  $\odot$ 's Disk,

	h	m	
Ingress	2	15	mane, - $\gamma$ Lat. N. 13' 27"
Ecliptic $\odot$	4	25	- - - - - 11 54
Middle	4	57	- - - - - 11 31
Egress	7	38 $\frac{1}{2}$	- - - - - 9 35
The nearest approach of the centers			- 11 43

I promised in my last to make mention of the Sybils in support of my vindication of the truth and certainty of prophecies in all ages of the world. They were in number ten, who in different periods plainly foretold what afterwards a Christian world found to be an undeniable fact.

The first of these is *Sybilla Persica*; and is said to be the most ancient.

*Sybilla Lybica*; a native of Lybia.

*Sybilla Delphica*; born near the temple of Apollo at Delphos.

*Sybilla Cumea*; one of the priestesses of Apollo at Cuma in *Æolia*.

*Sybilla Samea*; so named from the Isle of Samos, where she was born.

*Sybilla Cumana*; who declared the succession of the Assyrian, Median, Persian, Grecian, and Roman monarchies.

*Sybilla Europea*; of whose pedigree history is silent.

*Sybilla Tiburtina*; who derives her name from the river Tiber.

*Sybilla Erithrea*; born in Babylon, daughter to Berofus, a famous astrologer.

Lastly, *Sybilla Ægyptia*.

The prophecies of these Sybils were thought, by the primitive fathers of the Christian church, to be of such importance, that *Justin Martyr*, *Origen*, *Lactantius*, *St. Cyril*, *St. Augustine*, *Eusebius*, and other learned men, never failed to alledge these against the Pagan enemies of our holy faith. And to prove that they were not the inventions of after ages, it appears that Marcus Varro, a learned Roman, who lived a hundred years before Christ, gives an account of the number, writings, country, and ages of these Sybils, and of the authors that mentioned them before his time.

That *Sybilla Erithrea* lived about six hundred years after Noah's flood, and before the wars of Troy, Apollodorus and Varro, her countrymen, testify. Also that she foretold that

the mighty Troy should be destroyed by the Grecians. Further, we find that Augustus Cæsar for the prophesies of the Sybils had so great esteem, that Suetonius tells us he deposited them under the altar of Apollo in the Palatine hill. That some of them the poet Virgil had seen, wherein was prophesied, That the great ordinance of God, from the beginning of the world, was to be fulfilled, the virgin should come, and the golden age return. A new progeny sent down from Heaven, the dearly beloved of the Parent of all; under whose guide and protection the sins of the world should be done away. Some of these antient truths I may from time to time in future pages insert. Suffice it here to say, that thus encompassed with such a cloud of witnesses, let us set aside those two grand enemies to truth, viz. a stupid head and an obstinate heart, fairly and honestly acknowledge that God has been pleased, at all times, and in all places, to communicate in such measure, and by such means, as to his infinite wisdom seemed best, a foresight into futurity. Had the end not to have been obtained, why then was implanted in man this fond desire; this longing after knowing future events. To those foolish people who attribute all this to the devil, the father of lies, I will only ask, do you expect truth from him? Surely not; but instead thereof, deceit, and malice, and base guile.

I am sure, what I insist upon is, that God has many ways of revealing his will and hidden counsels, and by which from age to age he has, by different modes, communicated them to mankind; if not, he who said in the latter days I will pour forth my spirit upon you, your young men shall see visions, and your old men shall dream dreams, certainly told you a very idle tale. But confiding in the good sense of my readers, who I am positive are not thus to be cheated into error, I, according to my accustomed method, proceed next to the prophesies of Nostrodamus.

That which I shall at this time produce, is the sixty-seventh of his sixth century, and considering the great changes a few fleeting years have produced in this sublunary globe, may possibly be now on the point of being fulfilled. It is as follows:

Au grand empire par viendra tout un autres,  
Bonte distant plees de felicite,  
Rege par un issu non loin du peautre,  
Corruer regnes grande infelicite.

In ENGLISH as follows :

To the great empire quite another shall come,  
Being further from goodness and happiness,  
Governed by one of base parentage,  
The kingdom shall fall, a great unhappiness.

I shall make no comment upon the above, but leave every one to his own interpretation, with this remark, viz That when the prophecy is fulfilled, the matter is as clear as noon day; as that mentioned in our last plainly testifies; but till the time appointed, through a certain obscurity, is liable to be misapprehended, like that upon an old image in Wales, called Davel Gathern, of which an old prophecy currently went, that it should burn a forest. At the dissolution of abbeys under K. Hen. 8th it was brought to London and burnt under the gallows in Smithfield, with the bowels of one friar Forest, who was executed for a traitor. Now, although I am far from running away with every idle tale, said to be foretold by a Mother Shipton, or I know not who, yet I see no reason for flying into the opposite extreme; like those who, to shew their unbelief in apparitions, fall directly into the error of the Sadduces, who say there is neither Angel nor Spirit.

If however after all, obstinacy in some should prevail over sound argument and facts experienced, I wish not to disturb them.

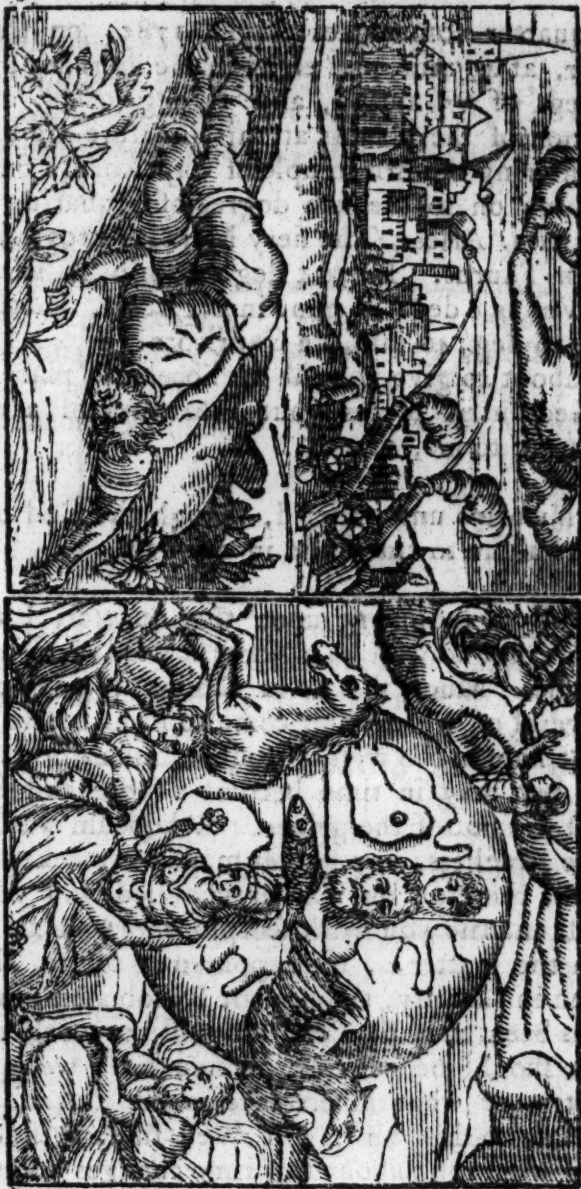

They may call themselves men of solid heads; and I will do myself the favour to believe them; for wit and spirit may evaporate, but bone cannot so conveniently. Four more pages put a period to the limit of the present performance, so leaving the subject to another opportunity, preceed we immediately to the Hieroglyphic, the original of which, if, I am rightly inform'd, is preserved as a curiosity in the Vatican at Rome, and to my judgment is portentous of something very applicable to the stanza of Nostradamus just mentioned.

# PROGNOSTICATIONS.

45

OF MR. BRUMAD, & WINTER QUARTER

*Of the BRUMAL, or WINTER QUARTER.*

This quarter commences A. D. 1785, on the 21st of December, at 47 min. past eight in the morning; at which time 8 deg. of ♊ ascend, and 14 deg. of ♎ culminate. The position of the planets at this juncture are as follows. Sol just entering the first scruple of Capricorn. Saturn heavily creeping on to the 4th degree of Aquarius. Jupiter 5 deg. 34 min. Aries. The fiery Mars is retrograde 29 deg. 10 min. in Taurus. Luna 4 deg. 27 min. in Virgo. The celestial Venus 8 deg. 12 min. in Sagittary, and the winged Mercury 19 deg. 46 min. in Capricorn.

I was about to give you the Heliocentric places, as well as the Geocentric places; but the words of a celebrated poet occurred to me, viz.

Through worlds unnumber'd, though the God be known,  
'Tis ours alone to trace him in our own.

In passing a judgment upon this quarter, I think that matters are not so well as a good hearted man would wish them to be. Much debate in cabinets; many designs on foot; several of which shall come to light before maturity. An infant state in the west is troubled much in its bowels at present; but may in time become a large and flourishing one, if it die not of the gripes. Rehoboam was advised to say to the Israelites, my Father made your yoke heavy, but I will add thereto; my Father chastised you with whips, but I will chastise you with scorpions. And all that I can say upon the matter is, that apparently to me, that if it is to flourish in futurity, the present Rehobohams must perish. What has been, may be; and I should not wonder if the cry hereafter should be,—What portion have we in our new-born states, or what inheritance in the sons of Congress: Every man to his tent, Oh West-Indian Israel. Some person of high rank about this time changes a state of short anxiety for an endless certainty. I will not say in what department; but I think I may affirm that time will shew the truth of my prediction. What I have further to add, will as well come in my observations on the other quarters.

## Of the SPRING QUARTER.

This quarter commences this year on the 20th day of March, at 29 min. past 10 in the morning, when the bright luminary Sol makes his first ingress into the cœlestial Aries; at which time the position of the Heavens will appear by the following Scheme.

In this Scheme we may observe 9 deg. 35 min. of ☉ ascends, and 5 deg. of ♄ culminate. The Sun at this time is near upon a conjunction with Mercury. The aspects of this month are of various significations, and bespeak more bustle in the world than a peaceable mind would wish for, this is enough for me to say; how they will terminate, Eternal Wisdom only knows; expect murmurings, and the malicious endeavours of many to distract, if not to poison, the principles of the multitude. But we have one sure refuge: Let the serious reader put on the helmet of righteousness, and trust in the rock of ages; if God be for us who can be against us. I proceed next to

*The SUMMER QUARTER,*

Which commences June 21, at 29 min. past 8 mane. So then enters upon  $\varnothing$ ;  $\text{D}$  is 28 deg. in  $\gamma$ ; the nimble Mercury 17 $\frac{1}{2}$  deg. in Gemini; Venus in  $\varnothing$  23 deg. 48 min. Mars is about half gone through Leo; Jupiter is at this time in Taurus; and surly Saturn is retrograde in  $\text{m}$  to the 13th of October, he will then be stationary to the 20th.

These are the positions of the celestial wanderers at the commencement of this quarter. The aspects are many, and bespeak more ill than good; however, towards the conclusion they are more favourable, the effects of which may possibly in due time take place; colds are easily caught in this and the ensuing quarter, and are too often fatally neglected; I must needs say, however, that ancient proverbs properly regarded are very useful; and the well known one that I refer to at this time is this, viz. A stitch in time saves nine.—If upon the first assault of a cough, you only mix treacle with any acid, such as verjuice, vinegar, or alegar, and take a spoonful or two ad libitum, you need seldom apply to any thing else. If it appears to fix, immediately apply to the recipe prescribed in our last. Proceed we now to

*The AUTUMNAL QUARTER.*

This quarter commences the 22d day of Sept. at three min. past ten at night. The aspects are various, and some of bad import, Jupiter and Saturn are both retrograde, and I apprehend more mischief design'd than I hope will be executed. And now to conclude: In my humble sentiments, if it is not a year of desolation, it will be, I apprehend, a year of much distraction; I am speaking in states; and that not only in Europe, but in all the habitable world. The same effects shall be produced in private estates and families, and many changes will this year be produced, which in the last was never dreamt of. Much more might be said, but here is enough for every considerate man, and those who are otherwise, I leave time and experience to improve. One lesson more and I have done. You and I (my kind reader) have not a many rolling years to exist in this transitory state; let us improve the hours we have to the advantage of our never dying souls. So may we at the hour of death rest in hope of a joyful resurrection, and at the day of judgment rise to bliss immortal, and joys eternal. Amen.
